Migrate to ANGEL LMS

When Change is Good

Changing LMS providers may seem scary or overwhelming. We understand your fears because a vast majority of ANGEL customers migrated from a competitor's product. Interestingly, the two most common customer comments we hear are: "Switching is easier than we thought" and "We should have done this long ago."

Protecting Your Investment

ANGEL simplifies migration with tools developed to streamline procedures and reduce downtime and anxiety. Technical tools help preserve your investment in course content and demystify the transition process. An Import Wizard makes course conversion easy while a Batch Import Utility with Drag-and-Drop capabilities enables the efficient migration of volumes of courses. And ANGEL's proven customer support offers further assurance that your move to ANGEL will be backed by an unmatched record of responsiveness and customer satisfaction.

ANGEL import tools are available for Blackboard™, WebCT™ and the IMS Common Cartridge. In fact, ANGEL was the first commercial LMS to support imports on this important emerging standard.

ANGEL Course Conversion Benefits

- Simple and powerful content conversion
- Efficient batch course import
- Maintains IMS compliant course structure
- Minimal re-work required
- Full enterprise functionality

Migration Case Studies

Schools switch to the ANGEL Learning Management System for a wide variety of reasons. The following case studies illustrate just a few of the successful transitions from another LMS to ANGEL.

LMS Adoption Climbs with Switch to ANGEL

Less than three years into its ANGEL implementation Buffalo State College's online presence has grown 340%. College personnel are "100% satisfied."

ANGEL Adoption Extends LMS Usage Campus Wide
Challenges with its previous LMS caused Creighton University to conduct a search for alternatives. Since choosing ANGEL, LMS usage has grown campus wide and "many groups on campus are excited about the possibilities ANGEL provides."

Switch to ANGEL Brings Added Benefits

On the heels of Grand Canyon University's "absolutely flawless" conversion to ANGEL, expensive downtime is gone, technical support calls have decreased, and ANGEL functionality is positively impacting student retention.

Why a Small University Chose the ANGEL LMS

ANGEL LMS 7.3 Features

The ANGEL Difference
Ease of Use

Testimonials

A Fresh Start

Over the last year or two, we experienced a steady decline in support from the provider of the CMS we originally licensed and prices were increasing. We considered adopting ANGEL as a fresh start. We're very pleased and excited with the tools ANGEL provides.

Ohio Dominican University switched to ANGEL when licensing and migrating to its original LMS provider's newest version proved cost prohibitive. One of the reasons cited, "ANGEL's high level of responsiveness."

-Bob Gasson, VP for Information Technology Services, Southwest Baptist University

True ANGEL Value

When our original LMS provider increased its price substantially, we put our faith in ANGEL, and over the past two years we have not been disappointed.

-Jedediah Hock, System Administrator, St. Lawrence University

Features and Support Tip the Balance from Open Source

Ohio H-Point "simply outgrew" the open source CMS they originally adopted. Now, their users tell them ANGEL "is much easier to use."

Fast Track Conversion Leads to Benefits

Usability issues and lack of responsiveness led Seminole Community College to look at alternatives. Since their switch to ANGEL, LMS usage is up, support calls are down, and ANGEL's automatic course creation and SIS integration save the college time and effort.
